Contact Lens Policy

I am interested in a complete contact lens exam today. I understand that the fees are divided into 3 categories:

1. The Annual Comprehensive Exam
This exam starts at \$185.00 for new patients and \$140.00 for established patients, depending on which additional procedures are required or recommended. This portion of the exam checks your visual function, eye health, and results in an eyeglass prescription if needed. This portion of the exam also serves as the starting point for a contact lens prescription.
2. The Annual Contact Lens Evaluation
This service starts at \$60 and depends on the type of lens that you and the doctor decide works best for you. This service includes the initial fitting or re-fitting of your lenses, any training that may be required and follow-up visits (including the quarterly progress evaluations). This is the portion of the exam where the contact lens prescription is finalized. **This fee cannot be waived.**
3. The contact lens materials
The materials start at \$22. This also depends on the lens type you and the doctor may decide is best for you.

The comprehensive exam and contact lens services are **annual fees**. There are **no refunds** on professional fees (exam and contact lens service). The prescription is valid for **one year**. Please note that the Comprehensive Exam differs from the Annual Contact Lens Evaluation.

If you have ANY questions, please feel free to ask any of our staff members.

I have read and understand this Contact Lens Policy.
